To whom it may concern:

I would like to officially add my voice to the list of those expressing the need for significant revisions to the Proposed Final Judgement (PFJ). The current PFJ is so weak as to be a waste of taxpayer money, and I find that offensive.

There are so many weaknesses it's hard to know where to start, so I'll just mention what I think is the area in direst need: the failure to prohibit anticompetitive license terms currently used by by Microsoft. Please refer to:

Thank you for your time, and please act for the benefit of the entire industry.
